

A new era of Product Designing!
Let algorithms do the work for you.

Senior Frontend Web Developer (m/f/d)

Join us and develop software for the age of digital manufacturing. Our core product, **paramate**, enables the creation of truly awesome custom 3D products.

[apply now!](#)

You love to develop innovative solutions? You have extensive experience in **frontend web development** and are strong in **JavaScript, HTML and CSS**? You like to see your ideas come to life and want to work with an ambitious tech startup?

Then this is the perfect job for you!

We are a young, ambitious, award-winning, VC-funded tech startup from **Berlin**. Our core software, **paramate**, automates 3D-designing and enables **mass-customization of 3D-printed products**. Our high-performance, easy to implement cloud solution is a tool for making innovative customizing applications. It is used for a wide range of industries, from mechanically optimized robotic components to patient specific orthotics. But it can as well be used by makers for their creative ideas.

Who are we looking for?

For our team we are looking for **senior frontend web developers** who help us build the web frontend parts for all our exciting products and applications. You would mostly work on our own products, including participating in the development of our frontend libraries, but help with our general websites and the web frontends of our clients' projects as well.

You should be able to work independently, like to collaborate and help our developers and product team with your experience and knowledge. You should be ok with dealing with our business customers from time to time. Having a good spatial and technical imagination is needed as well, but most important is your passion for your work and your willingness to build up knowledge.

We are a small, tight-knit team of developers with a lot of projects on the go. We need someone who delivers **well-structured** code and **maintainable** solutions with a high level of **usability**, who is driven to get things done and who we can rely on.

Get to know the required skill-stack and learn what's in for you! Check out page 2/2

Requirements:

Web Frontend

- strong, up-to-date knowledge and experience with HTML, CSS, JavaScript
- extensive experience with building responsive web application frontends
- capable to develop JS libraries with well-thought-out architecture
- comfortable with vanilla JavaScript
- knowledge of modern JS frameworks or willingness to learn, React is a plus

Other

- git
- Jira
- some knowledge in WebGL is a plus

This is what we offer:

- an interesting job where you can contribute to the rise of an exciting new technology
- the flexibility you need:
 - full-time or part-time, we are open, your choice
 - no matter if early or late riser, we want you when you are at your best
 - if you need to balance work and private life, we offer flexible working hours
 - work on-site or choose from various remote options (preferably in Germany, monthly meetings in Berlin should be possible)
- a friendly, international and motivated team (English/German speaking)
- team events and team cooking
- nice, open office loft with a fully functional kitchen in the middle of trendy Berlin Kreuzberg
- ambitious VC-funded tech startup with founders who love tech and are developers, like you

We care for the health and wellbeing of our team and their families. Since the pandemic we were working remotely, staying connected via slack and video calls. Now the team partly came back to our new shared-desk office, but we stay flexible for those preferring remote work.

Interested?

Then send us your application to jobs@trinckle.com. Your contact person is Yvonne Well. Please include a wage range and earliest possible start date with your application.

We look forward to meeting you!
